

Operation tips:

- 1) **Bumpers pre-installed on housings:** Do not remove pre-installed bumpers. The removal of one or both bumpers may cause damage to the housing during use.
 - 2) **Handle pole needs to be located in the center of the Wardrobe rail and pulled straight down and not at an angle:** This will avoid binding and ensure proper operation of the lift. Pre-installed O-rings keep the T-Bracket in position.
 - 3) **Assist the lift when lowering:** When lowering the lift, assist the Handle pole until the vertical arms rest on the Housing bumpers. Letting the lift drop on its own may cause damage to the housing.
 - 4) **Distribution and Weight Capacity:** Loading the lift with more weight than capacity will cause damage to the lift. Distribute weight of clothes evenly across the Wardrobe rail to avoid “racking”.
