

BLUMOTION for doors

For use with COMPACT hinges

BLUMOTION can now be quickly installed into cabinets with COMPACT hinges. It will work for any overlay and does not require any change to the hinge assembly.

BLUMOTION redefines the term “quality of motion”. The system is quick and easy to install and once installed, creates the perfect closing motion.

Quiet closing

This BLUMOTION is specifically tuned to the closing force of COMPACT hinges. Use its adjustment to achieve a smooth and silent close every time.

Features

- Adjustable for various door sizes and weights
- Installs on the hinge side of the cabinet
- Designed for use with Blum COMPACT hinges
- For use with partial and full overlay doors

Benefits

- Offers the same quality of motion as Blum drawer systems with BLUMOTION
- Easy to install on the jobsite
- Can be retrofitted to existing cabinets

Full overlay application

For cabinets with a 1" or greater overlay

Partial overlay application

For cabinets with less than 1" overlay (requires nylon spacer shown)

Easy installation

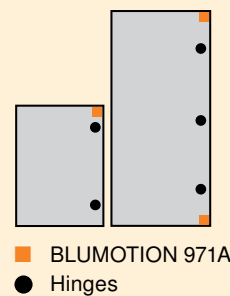

BLUMOTION 971A for COMPACT hinges installs anywhere on the hinge side of the cabinet with one screw (included in the polybag set).

Easy adjustment

The BLUMOTION mechanism can be adjusted in or out 5mm to fine tune the contact point of the door. This allows the closing action to be fine tuned for your door weight.

Number per door

One BLUMOTION for doors is enough for most applications. For larger or heavier doors two or more may be required.

***Trial application recommended.**
